

# ELECTROSTUNNER

## *ELECTROSTUNNER MODEL V (FOR BIRDS)*

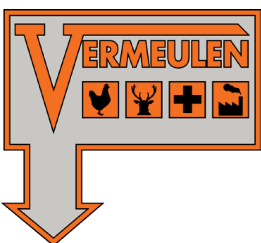

The stunner doesn't kill the birds but stuns them for a short period of time. The display with lights goes from 30 aM until 400 mA.

When the light goes green the birds are stunned. The period of time depends on the weight of the birds. Estimated time could be between 8 until 15 seconds. The stunner will adjust it's self to he right amperes depending on the weight of the birds.

The stunner must be wall mounted.

Works on 220 Volts.

Artikelnr. 15210
